- Wind Speed
- Temperature –
- Automatic Wind Direction
- Setting
- Select Celsius/Fahrenheit

Before use please insert two alkaline batteries 1,5V type AAA and plug-in the Air conditioner to the electric line.
(batteries not included)

## SETUP METHODS

The remote control can be set to 3 different ways described below, it is recommended to use procedure A because it ensures a more precise setting.

A DIRECT CODE STORAGE - RECOMENDED CHOICE

1. Connected to **www.wellclima.com/en/manuals** website, click on **Brands and Codes List** of **PLUS** model, find the brand of your air conditioner and its codes on the right, these are internal codes that don't match the product code and must be tested with your remote control. If your brand is not in the list you can send an e-mail to info@wellclima.com
2. Press and hold SET button, then press **POWER** button and release both buttons, the symbol '-----' flashes on bottom of the screen. Press 'TEMP▲' or 'TEMP▼' up to the first code found in Step1 appears (you can keep the TEMP keys pressed to scroll the codes faster. If the code is a number between 0000 and 2500 press the key ▲ , otherwise the key ▼).
3. Press **SET** to exit, check the button functions. If the device respond correctly the setting is finished, if not, please repeat steps 2 and 3 with next set of codes. Write the correct code in the space provided on the back of the remote control.
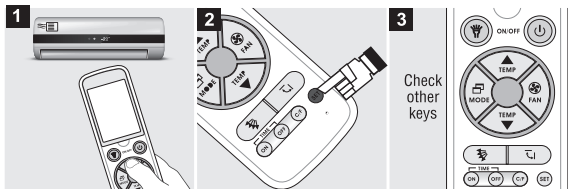

LOOK OUT: when you find the sign "-" between two codes you have to try all the numbers between the first and the second one (e.g. LG: 600-609 you have to test codes 600, 601, 602.... up to 609). If none of the codes works or if your brand is not in the list, don't worry, write by sending the information of your air conditioner to info@wellclima.com or try searching from the remote control (B).

B CODE SEARCH FROM THE REMOTE CONTROL

This operation is not very precise and may require more time, when possible use procedure A or contact our assistance if necessary info@wellclima.com

1. Aim the remote towards the air conditioner receiver window, press and hold **SET** button, about 6 seconds later the symbol "----" start to flash, at the bottom of the screen, keep holding the button until the air conditioner turns on. Release the key **IMMEDIATELY** as soon as the beep confirms switching on, it's very important to be quick in this step, otherwise the remote control will continue scanning and switch to another code, different from the working one.
2. Check the remote control, if the button functions work well the setting is effective. If not, please repeat steps 1 and 2.
3. A complete scan of all codes takes about 30 minutes. Don't stop the search before, or before the air conditioner switches on.

## C BRAND POINT-TO-POINT QUICK SEARCH

Quick setting only for some brands listed in Table 1
1. Aim the remote control towards the air conditioner receiver window.
2. Press and hold the appropriate code button corresponding to your A/C brand (for example ▲ button for LG and Samsung brand) until the air conditioner turns on and you hear a 'beep' sound; release the button, and the setting is completed.

Table 1 - direct selection keys by brand

MODE	FAN	TEMP ▲
Gree/Hualing/ Hisense	Daikin/Fujitsu/ Carrier	LG/Samsung
		TEMP ▼
Hitachi/Panasonic	Sanyo/Sharp/Haier/ Mitsubishi	Shinco/Aucma/AUX/ Frestech/Yair

3. Check the button functions. If the buttons work correctly, the code setting is effective. If not, please repeat steps 2 and 3.

Check other keys

INSTRUCTIONS FOR ADDITIONAL FUNCTIONS

1. **Celsius/fahrenheit function "C/F"**
   Press "C/F" button to switch between "Celsius" and "Fahrenheit.
2. **Security lock function**
   Lock: Keep pressed **SET** and then **M.SWING** buttons. The screen displays the **Security Lock** icon.
   Unlock: Keep pressed **SET** and then **M.SWING** buttons. The **Security Lock** icon disappears.
3. **Clock function setting**
   a. Keep pressed **SET** and then press MODE buttons until the hour digits flash.
   b. Press the **TEMP▲** (or **TEMP▼**) button to increase (or decrease) by 1 hour.
   c. Press the **SET** button to complete setting the hour. Now the minute digits flash. Press the **TEMP▲** (**TEMP▼**) button to set the minutes.
   d. After the minutes are set, press the **SET** button to exit clock setting.
4. **Timer on/off function**
   The remote control is equipped with the timer function of the original AC remote. Press the **TIME ON** or **TIME OFF** buttons (one press for one hour), the air conditioner timer light will switch on. This means that the air conditioner timer is now operational.
   ✱ This function requires the air conditioner to have the timer function, or else this button will not work.

REMOTE CONTROL FUNCTIONS

Fun control key	Mode Key	Blowing direction control	Automatic blowing direction	Power ON/OFF	LED

DISPLAY SIMBOLS

Air Recircolation	COOL	DRY	Cooling Fun	HEAT	Fan Speed

RESTORE TO FACTORY SETTING

Press and hold **SET** button and then press **FAN** button and hold them down about 3 seconds to restore the factory settings.

● Battery replacement memory

The remote control's chip has a built-in memory function, ensuring that there is no need reset for a short-term power off like battery replacement etc.

● Backlight

The backlight covers the whole panel. Press any button lo light it and it will switch off alter 10 seconds if there is no operation.

● LED Flashlight

Press and hold Ihe "Light" button to switch on the LED light. Release it to switch it off.

ANY PROBLEMS?

WELLCLIMA universal remote controls are compatible with 99% of air conditioners on the market and are guaranteed by law.
The remote control can operate only if the infrared receiver of the indoor unit is working; if you are unable to control the air conditioner with this remote control and not even the original remote control activates it, the problem could actually be in the receiver, contact us and we will show you how to verify it.
WELLCLIMA is the only company in the market that offers direct assistance on its products. If you encounter any problems or difficulties in using the remote control, visit the HELP & FAQs page on wellclima.com website or contact us directly: info@wellclima.com.
